

ALEAN

ABT2

40/60/80/100M

Alarm before intruder breaks-in!

ALEAN photo beam detectors, which offer more reliable protection and security options. It is designed to protect the perimeter of a building. Being one part of a complete system, it activates the alarm control panel when beams are blocked and protects a building's exterior before entry is attempted.

STRUCTURE

FEATURES

- 1) NC/NO relay output optional. Compatible with all security alarm system and other functions.
- 2) Built-in automatic adjustable strong light filtering system (up to 50,000 LUX), Good performance against direct sunlight, completely against fluorescent and car light.
- 3) AGC circuit, the detector will automatically increase sensitivity when faced harsh environment.
- 4) Easy alignment with LED indicators.
- 5) Resistant to rain, fog, snow and frost.

SPECIFICATIONS

Model	ABT-40	ABT-60	ABT-80	ABT-100
Detecting distance	40m	60m	80m	100m
Height	195mm			
Detection means	photoelectric beam detector			
Number of beams	2 beams			
Light source	Infrared LED			
Response speed	50-700msec			
Alarm output	Switch signal output(NO/NC)			
Power and Voltage	DC12~24V AC11-18V			
Current consumption	100mA MAX			
Operating temperature	-25°C—55°C			
Tamper output	1B contact output, DC26V/0.5A Max.			
Exterior dimension	28cm*22cm*12cm			
Weight	1.0kg
