

DUAL ZONE OUTDOOR PIR

MS-12TE

(Dual Zone : Variable Angle up to 90 degrees)  

MS-12FE

(2 Dual Zones : Variable Angle up to 180 degrees)

DUAL ZONE system reduces false alarms, making outdoor use more reliable !

DUAL ZONE system

This sensor is equipped with a DUAL ZONE system which initiates an alarm only when detection occurs in both horizontal and downward zones simultaneously.

No alarm signal is given if only one zone is activated by small animals, vehicles etc.

180 degree wide angle coverage (Only applicable to MS-12FE)

180 degree coverage detection is possible by using both upper and lower sensors in "OR" detection mode.

Rain Proof Housing

Rain-proof structure facilitates outdoor installation. Various mounting position such as wall and pole can be chosen.

Day light

With the day light setting, alarm output can be controlled by the illuminance of the surrounding environment. Operation during nighttime only is selectable.

Various detection patterns

Perimeter, window or wall detection can be made by adjusting detection zone with area masking sheet.

MS-12FE equipped with two sensors can cover two perimeters or windows by itself.

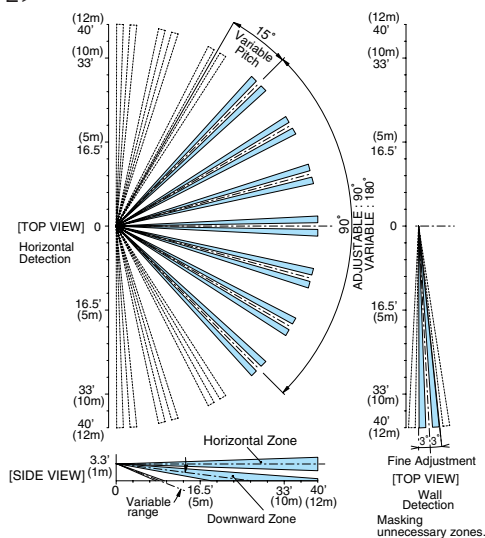

Sensitivity adjustment

Sensitivity can be adjusted between 30% and 170%.
